## 2. Import Asset Feature

### Steps:

1. Add New → Asset, Import Spreadsheet → Next
2. Download Template
3. Fill out template with new asset data
  - Leave ID column (A) empty
  - Profile section (columns K-P) must correlate with an existing profile in the system
  - Data must match appropriate asset type fields
4. Drag and drop OR click in the yellow box to select your template file

ITS-AMT Home Browse Add New Configure History

### Add New

Start Populate Review Submit

Select a type to create

Profile Asset

Select an entry method

Manual Entry (disabled) Use Existing Profile Import Spreadsheet

NEXT

ITS-AMT Home Browse Add New Configure History

### Import Asset

Download Template

Test import.xlsx (application/vnd.openxmlformats-officedocument.spreadsheetml.sheet)

✓ All records are valid

✓ 1 record/s imported successfully

PROD - 2.0

# Open Discussion

## Roll Call by Group:

- **Group 1: Regions 1, 2, 3, 4, 5**
- **Group 2: Regions 6, 7, 8**
- **Group 3: Regions 10, 11**

## **Examples:**

Are you experiencing any bugs with the new features?

Difficulties updating or adding new data?

Best practices you have come across?

# Next Steps:

## Priority Data Fields:

- Location – Latitude/longitude, County, Region, etc.
- IDs – Regional ID
- Installation – Installation date\*
- Contacts
- Procurement
